

Acknowledgements

The BPSD Best Practice Consensus Algorithm was created through the collaborative efforts of a working group of expert geriatric psychiatrists, physicians, nurses, pharmacists, and those involved in the care of persons with dementia in 2014. Elisabeth Antifeau and Dr. Carol Ward of Interior Health Authority are acknowledged for their work developing the original algorithm and for their continued dedication to the project. Working group members came together to do a content refresh of the BPSD Algorithm in early 2019. Experts across the province have provided invaluable expertise, time and energy to develop a consistent, updated algorithm to support person-centred, evidence informed care of persons with BPSD in long-term care in BC. The working groups members thanked for their commitment to the algorithm project are:

Interior Health
